

Plan now to attend

As a financial, investment, retirement, or accounting professional, long-term care planning can be challenging--specifically because it may not be the primary focus of your practice. In fact, you may even avoid it. Yet at the same time, learning about long-term care could be one of the most crucial ways to serve your clients. A potential exposure so great, it could render all other strategies meaningless.

Join us for a free webinar and learn options available for your clients with the Care Solutions--a portfolio of asset-based LTC products that can provide tax advantages and benefits even if care is never needed.

During this webinar you will learn:

- How certain annuities can benefit from the Pension Protection Act and provide income tax free withdrawals for LTC
- About products that issue all the way up to age 85
- How to use qualified money to gain long-term care benefits
- How to speak with your clients about a negative topic (LTC) in a positive way

This learning opportunity will give you the 'nuts and bolts' of our products and arm you with the knowledge you need to succeed. At the same time, you will gain a level of comfort and learn how to broach this at times difficult topic with your clients.
